

**DreamSpace Academy**  
Co-Creating The Dreams.

# Who are we?

**DreamSpace Academy** is a **community innovation centre** to tackle complex local socio-economic and environmental challenges with **challenge-based learning**

# How can you support us?

## Personal Engagements

Engage with us personally by one-to-one mentoring, training our trainers, advising, coaching, sharing your time and heart

## Impact Investments

Invest in us with fundings & grants, buy or donate us hardware & software tools, materials & services for impact as return

## Project Collaborations

Collaborate with us on international aid projects on peacebuilding & reconciliation, rural & women empowerment

## Service Bookings

Book our services in capacity building, design, research & development, digital fabrication, software & hardware product development

## Empower Us

Empower us by talking about us, connected us with like-minded people, nominating us to awards, challenges, fellowships

# Impact Investments | Funds

€ 5K

## Personalised Empowerment

Fund an underprivileged candidate's Lifecycle program consisting of 5 stages spanning 18 months

€ 20K

## Modern Infrastructure

Fund us to buy hardware & software tools, materials & services to create complex community innovations

€ 300K

## Innovative Ecovillage

Co-invest in building our innovative Ecovillage for harbouring local and international frugal innovators

€ 10+

## Lifeline Support

Fund our basic operational and utility costs by smaller monthly or larger one-time donations to keep us alive

€€€

## Trainee Sponsorship

Sponsor trainees from age 6 to 21 to support their capacity building workshops of different disciplines and durations

## **Impact Investments**

# Impact Investments | Infrastructure needs

Source: robodk.com

**What do we need ?**  
**3 Axis CNC Milling Machine**

**How much does it cost ?**  
**€ 5000**

**For which lab ?**  
**Mechanics Lab**

**What does it do ?**  
CNC milling machines are vital for digital fabrication of 2.5D & 3D designs on thicker and stronger materials.

**Why do we need ?**  
Our community innovations mostly consist of complex mechanical parts, such as a housing of watertight underwater glider or stainless gears of recycler to shred plastics. With this machine, we will be able to locally manufacture and create a sustainable income by providing fabrication service.

**What do we need ?**  
**80W Laser Cutter**

**How much does it cost ?**  
**€ 5000**

**For which lab ?**  
**Mechanics Lab**

**What does it do ?**  
**Laser Cutters are vital for digital fabrication of 2.5D designs on thinner and lighter materials.**

**Why do we need ?**  
**Our community innovations mostly consist of complex mechanical parts, such as a housing of watertight underwater glider or stainless gears of recycler to shred plastics. With this machine, we will be able to locally manufacture and create a sustainable income by providing fabrication service.**

# Co-Creating The Dreams

Join our mission to **co-create**  
a sustainable impact !!!
